

# Print Bleed Guide

Remove the template layer before uploading your artwork.

**Bleed Line**

Extend background color or artwork to this line to avoid any white edges from the trimming process.

**Cut Line**

This is where we aim to trim the product. The actual line can vary due to the trimming process.

**Safe Line**

Keep text and important imagery within this line to ensure it does not get cut off during trimming.

A diagram showing a rectangular template with a solid black outline, a dashed red inner border (Bleed Line), and a dashed green inner border (Safe Line). The diagram is used to illustrate the relationship between the Bleed Line, Cut Line, and Safe Line.
